you ever
wanted to
know
about D-Star
Radio.

"Walburg D-Star Repeater/Antenna Site"

On Friday, November 6, 2009, three (3) Heart of Texas Emergency Repeater Association (HOTERA) members along with five (5) members from the Georgetown D-Star Users Group met to do some work at the Walburg repeater/antenna site. Three (3) new D-Star antennas, 23cm, 70cm and 2 Meters were installed at the top of a 250 foot tower. In May of 2020, the 70cm installation was deactivated and replaced with a Fusion Repeater.

At the 200 foot level, a 440FM repeater antenna was also installed. The FM repeater is an open repeater and can be accessed at 443.300 dup+ with a tone of 88.5.

There is a vast amount of information about D-Star on the web. A good place to start is <http://www.dstarinfo.com/>

A list of D-Star repeaters in Texas is on the following page.
