

## **Computer Club E-Newsletter** **September 2, 2018 – September 8, 2018**

### **Basic Computer Training**

If you are relatively new at using a computer, or simply would like to learn more about computers and computing, please join members of Sun City's Computer Club at an informal get together on **Tuesday, September 18th. from 10:00 until 11:30 a.m. in the Activity Center's Cyber Center Annex, 1 Texas Drive.**

The purpose of the meeting, open to all Sun City residents, will be to determine residents' needs and interest in acquiring a basic understanding of computers and their use. An instructional program may then be developed and become available according to the response to this meeting.

Please share this information with anyone who might be interested in attending.

Note: Occupancy of the Annex is limited to 49 by code. Seating will be first-come, first-served.

### **Lab Computers**

Several of the computers in the Lab have special software installed, such as Ancestry.com, Vector Vest, and ProShow. If you are using one of these PC's but not using the software, the Monitor may ask you to move to

another PC if a member asks to use that software. Please respect the request of the Monitor if you are asked to move. Thank you.
