

VOLUNTEER OF THE MONTH

nominated by Terry Kennedy and Pete Nadolski

So what happens when you have significantly under estimated the amount of trash 300+ players can generate, and you discover that the ice machine cannot keep up with the demand? That's the situation the club found itself in during the Spring Classic earlier this year. Along comes Billy Blackman with a solution. He used his pick-up truck (much to Judy's Surprise) to make several trash runs to various dumpsters on both Saturday and Sunday. On separate runs, he found some of the industrial ice machines that had surplus ice and brought back coolers with the frozen gold. We are not sure what we would have done without Billy's help, but his willingness to step up bailed us out of a bad situation. Thanks Billy! You made our day!
