

August 2010

Welcome to the eighth **iDevices** (iPhone, iPod & iPad) SIG Meeting

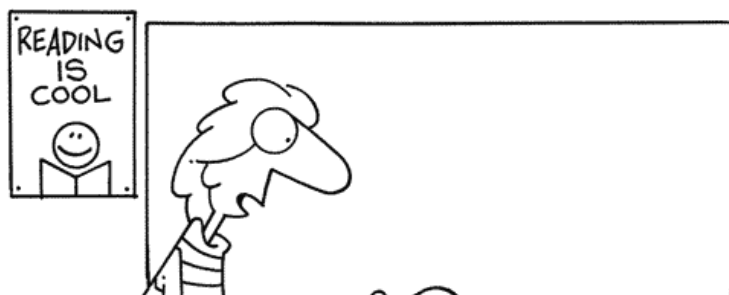

Notice the new name? iDevices is much shorter.

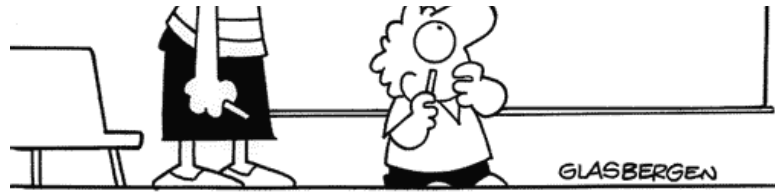

To go to the iPhone, iPod & iPad **FORUM**, [click HERE](#)

To find Apps that cost money but are **FREE** today, [click HERE](#)

In order to make this a successful presentation, I am asking that you do not use your iPhone, iPod or iPad to access the web during the meeting.

“There aren’t any icons to click. It’s a chalk board.”

Not much has been happening since the last meeting. However, if you have the new iPhone 4 then you should have received an email from Apple about the iPhone free bumper or case that is offered. If you have not accepted the offer, you should do so very soon before the offer expires. It's free so why not?

Apple iPhone 5 Preview

By Allen

I hope that you have been visiting the free apps site once in a while. Remember that these offers sometimes only last a few hours instead of days. I have found some apps that cost up to \$10.00 and are free for a very short time. Sometimes it is only because of a special

holiday or a new update. You never know what they are thinking at the time.

End Those Embarrassing "Zune Moments"

Owning a Microsoft Zune player in an iPhone dominated world can become a huge social stigma. Especially if you're one of those trendy up-and-comers. We've solved the stigma associated with owning a Microsoft Zune by creating the "iFace". The iFace attaches to your Microsoft Zune using a hinge & latch mechanism. Once installed it transforms the outer appearance of your Zune player to resemble an iPhone INSTANTLY. With the iFace you'll never have to lie to your friends about why you own a Zune. You won't have to hide your Zune, you can use it as you always have, in any setting. Isn't it time you get your confidence back? Pick up an iFace for your Microsoft Zune today.

OPEN **CLOSED**

A REGISTERED-MEDIA.COM PARODY

See a friend approaching? Quickly close the iFace cover on your Zune player putting it into an instant state of "incognito"! People will think you actually own an Apple iPhone.

STOP asking yourself, "Why did I ever buy this thing", and **START** making people think you're hip and trendy once again.

Get a new face with "iFace"...
Pick up an installation kit today!

Available for only \$14.95 at Best Buy, Circuit City, and truckstops everywhere.

No Cingular Contract Required!

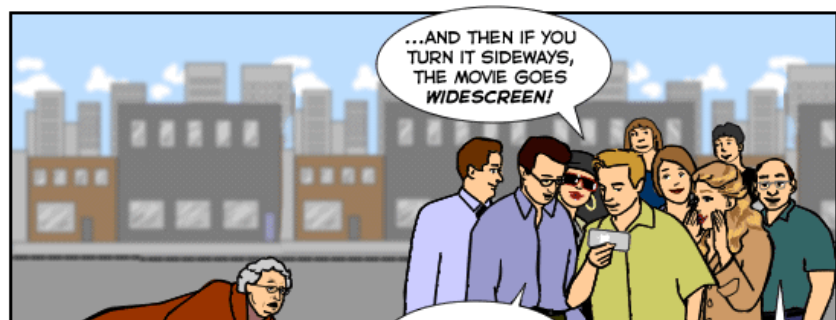

Designed for ZUNE

Because I have been looking at this site, I found an app that let's you save web sites found on the Internet for reading later on if you want. What's interesting is that I am now on the beta testing team for this app. This means that I can give advise about changes that I would like to see made to the app. Some of my suggestions have taken place! That's nice.

One of the things that I am trying to do is to do a lot of the web site preparation using my iPad. Typing takes a little getting used to but after a little practice I can type pretty fast and become fairly accurate. This is becoming a great tool to use for a lot of things.

If you haven't synced your device with iTunes since the middle of July then you need to do so. There is a new operating system update available for them. It fixes some of the problems that have been identified by Apple.

The Joy of Tech™ by Nitrozac & Snaggy

The other iPhone lawsuit.

Since there isn't anything else that is new I would like to use the time to discuss issues, concerns and special app finds that you may have. I don't want to just have this SIG as a lecture time. I also want to remind you that if you have any problems that you cannot solve that you use the Forum in order to find a solution to the problem. I say this because it is a way for others to find solutions to a problem that they may have that has already been solved and thus is already listed on Forum site. Also, this Forum gives others a way to give solutions that I may another be able to solve. We share and we succeed.
