iPhones, iPods & iPads Class

This class meets in the CC ANNEX instead of the Cybercenter Classroom. Please bring your iPhones with you to class.

Four, two-hour sessions

Fee: \$20.00

Description: The iPhone is the latest generation of 'smart' mobile phones operating as a small, hand-held and entirely portable computer. The iPhone comes with twenty standard 'apps', including e-mail, maps, internet, calendar, contacts and much more. This course will introduce you to the functions of these apps and basic operations, such as navigating the device, folders, cut and paste, bookmarks and camera functions.

The examples used in the class are based on the iPhone 4, but approximately 90% of the

content is germane to the iPad and 80% to the iPod Touch. If you have an iPhone, iPad, or an iPod, you will learn a lot in this class.

Objectives & Course Summary: Upon completion of this course, you will be able to:

- Use the standard components of the phone.
- Understand the basic operations of the phone: touch scrolling, call answer and call dialing/return, apps location and function.
- Understand how to customize your phone in the settings menu.
- Understand the necessary requirements for installing apps.
