For Example:

Maybe you need to sign and return a PDF you received in an e-mail

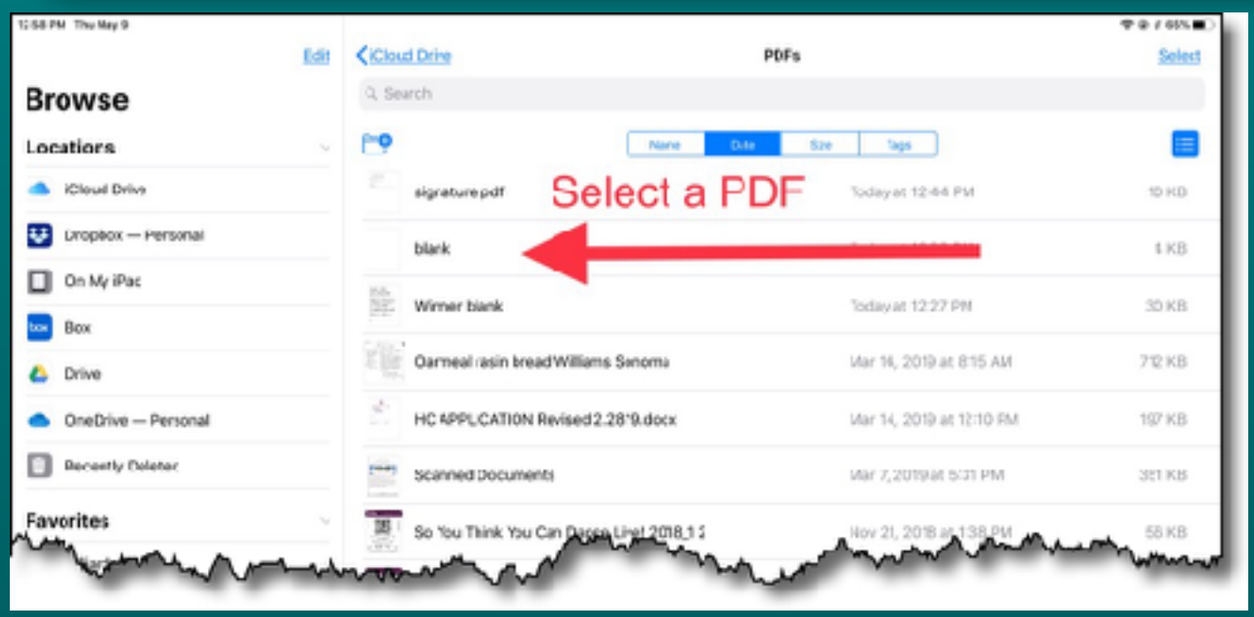
Open a PDF (or a Photo)

- I prefer creating the signature on a iPad as the screen is larger and it is easier to make my signature legible

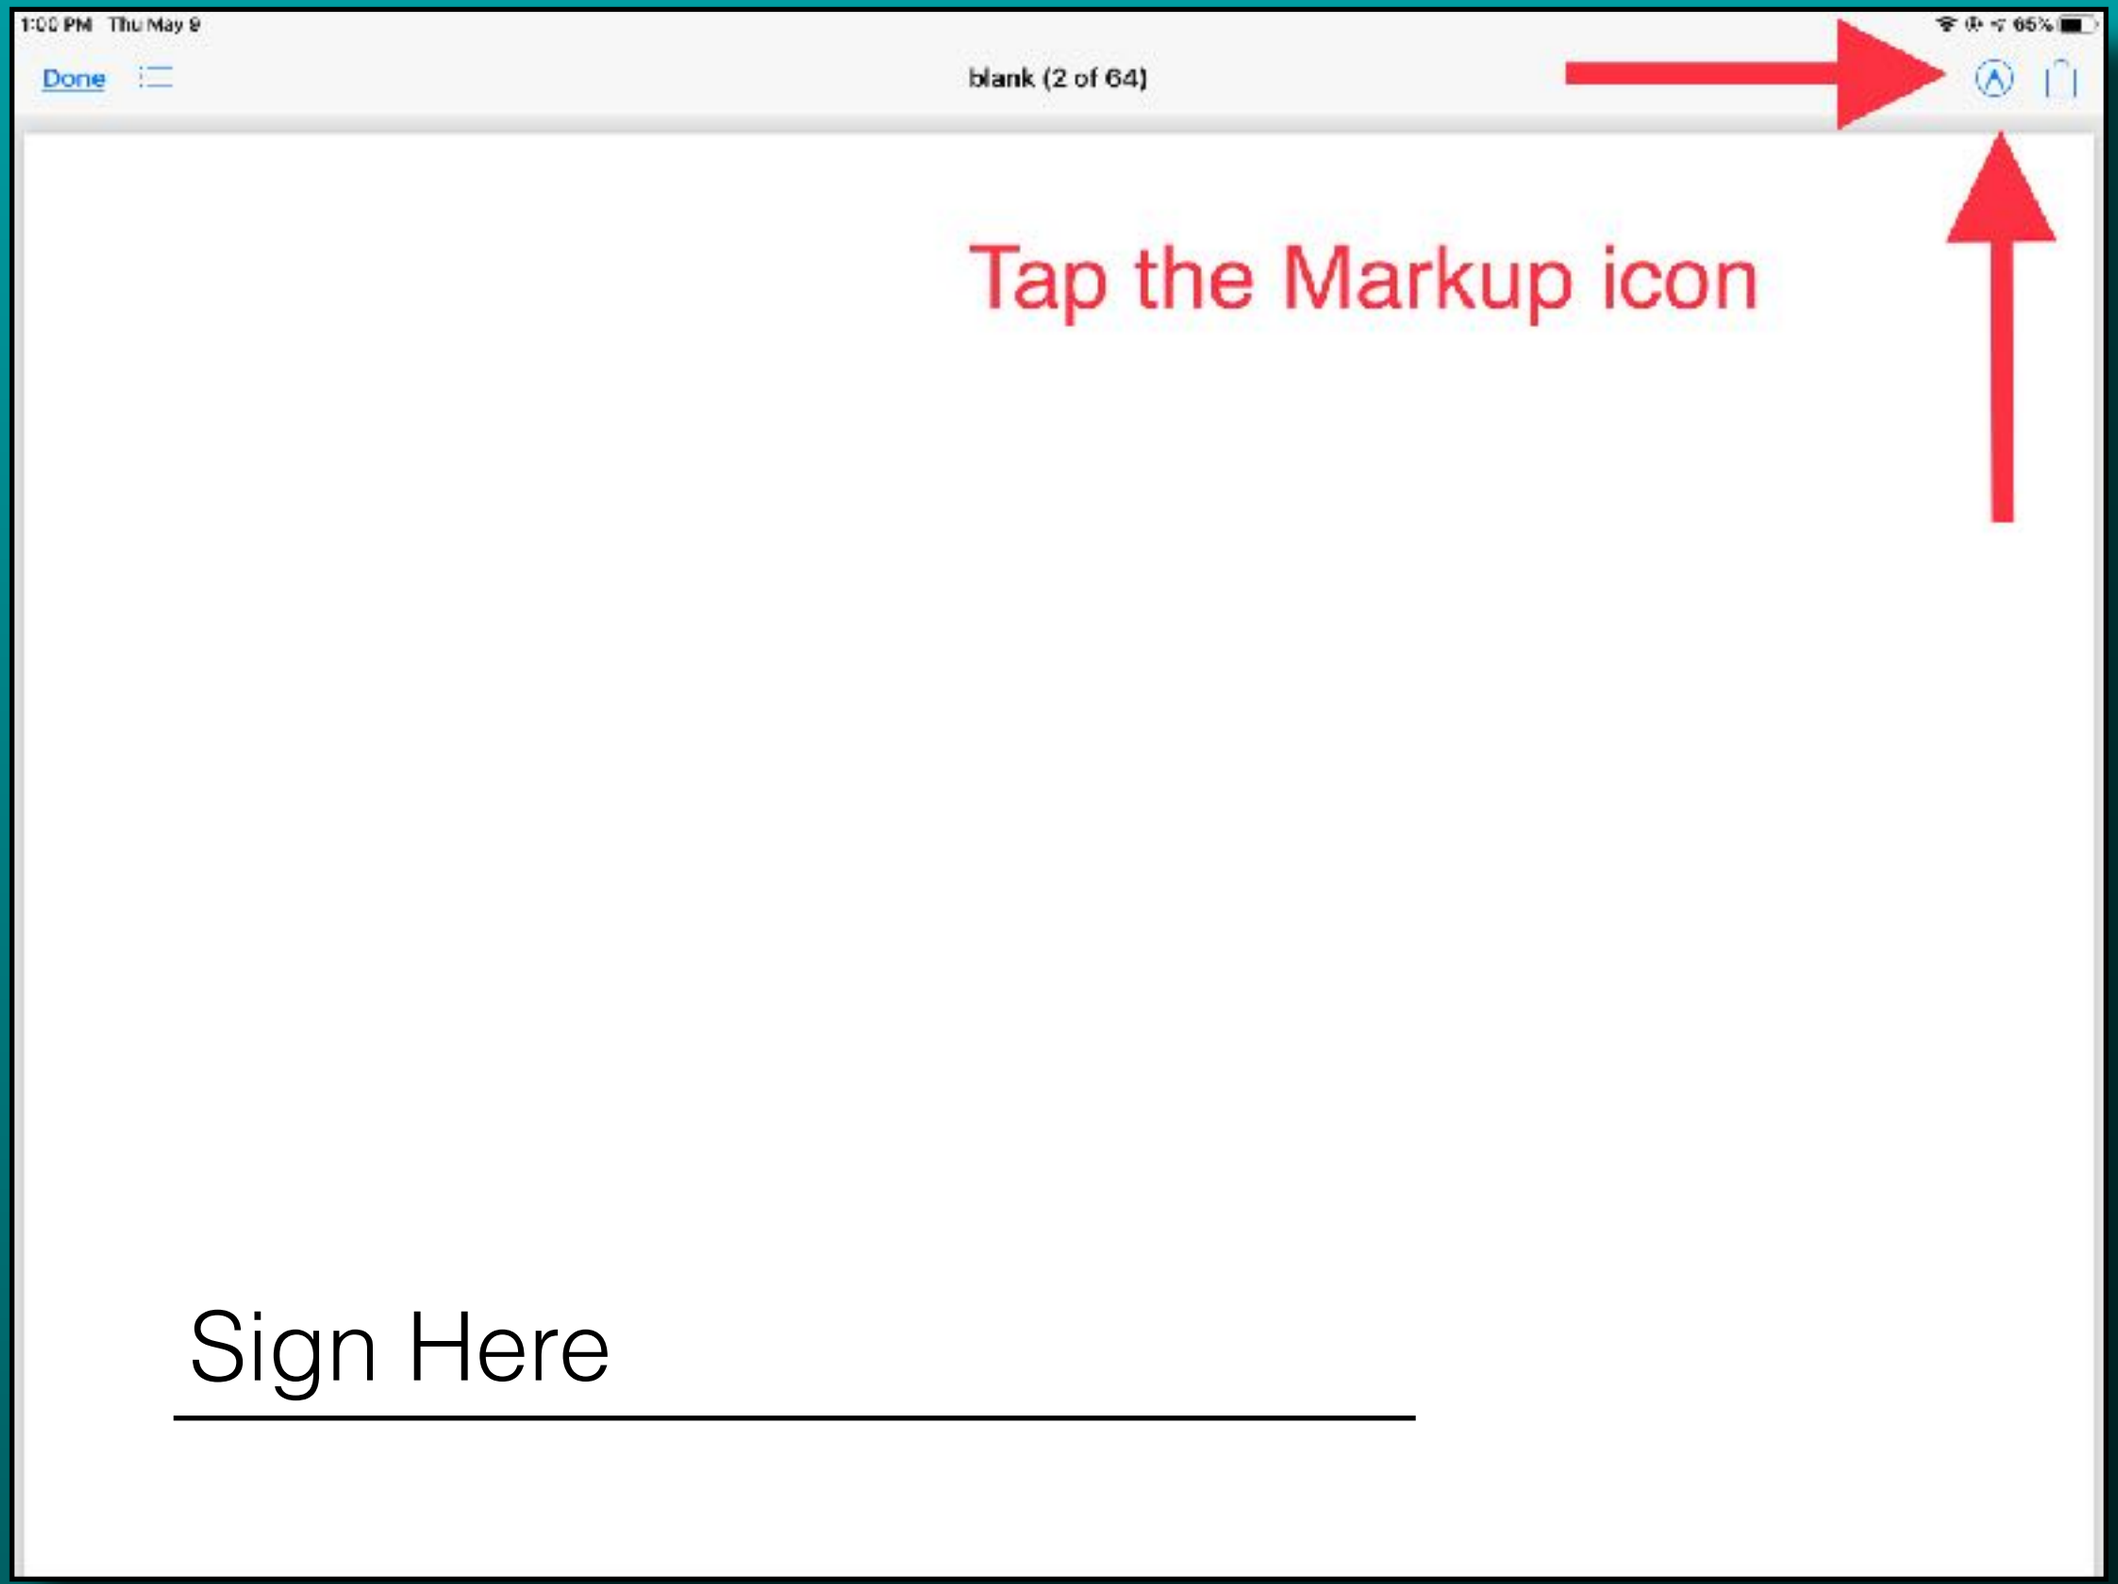
- I also use a stylus or Pencil for legibility, but a finger works too!

Open a PDF (or a Photo)

- If you use iCloud Drive, you may have a pdf in one of your folders
- If not, you can select a photo from the photos app



Once the PDF is Open



Now that you are in Markup…
