# Modern Life

### Modern Life

### Modern Life

I might have a slight drinking problem...

My husband asked me to toast some bread for him.

I raised my wine glass and said, 'Here's to bread.'

#### Use 5G with your iPhone

iPhone 12, iPhone 12 mini, iPhone 12 Pro, and iPhone 12 Pro Max work with the 5G cellular networks of certain carriers. Learn how to use 5G cellular service.

#### What you need

- An iPhone 12, iPhone 12 mini, iPhone 12 Pro, or iPhone 12 Pro Max
- A carrier that supports 5G
- A 5G cellular plan<sup>1</sup>

If your new iPhone comes with a SIM card, use that SIM card. If not, use the SIM card from your previous iPhone. In some cases, you need to contact your carrier to set up the SIM card from your previous iPhone for use with a 5G network.

#### Understand the 5G icons in the status bar

When you're in an area with 5G coverage for your carrier and your 5G cellular plan has been activated, you'll see a 5G icon in the status bar of your iPhone:

5G+

Your carrier's 5G network is available, and your iPhone can connect to the Internet over that network.<sup>2</sup> Not available in all areas. Your carrier's higher frequency version of 5G is available, or your iPhone has an active connection over that network. Not available in all areas.<sup>2</sup> Your carrier's higher frequency version of 5G is available, or your iPhone has an active connection over that network. Not available in all areas.<sup>2</sup>
