MEETING NOTES

CyberSecurity

Life, Liberty and the Pursuit of Happiness Any or all of these basic human rights can be taken by our current cyber environment, our home network, and/or our Internet connected devices.

Life *low risk* implanted medical devices, health records.

Liberty *medium risk* use of your network or device by criminals to attack others. Unwarranted surveillance.

Pursuit of happiness *high risk* fraud via your network or devices.

The Cyber Security SIG mission: To help preserve these rights by raising awareness, preparedness, and understanding of the threats and techniques that attack these rights.

The SIG is scheduled to meet on the first and third Thursday of each month at 3 pm in the Annex.

Topics for the SIG meetings are chosen by the SIG membership.

Current news articles are given in the CYBERSECURITY NEWS BLOG link on the SIG microsite.

To join the Cyber Security SIG contact the SIG at SCCCCyber@gmail.com

One ring Phone scam

Reports from other regions of the U.S. now reported in Texas. A single ring, often at night. The one ring call may be repeated. The area code 222 or 232. These area codes are in Africa. If and when the called party calls back they will incur large charges on their next phone bill.

The scam uses a victim's curiosity to solicit the call back. So don't.
