A Wiki for the Sun City Texas Computer Club

What is a **Wiki** ? A Google search for "What is a Wiki" is likely to produce this result: <https://en.wikipedia.org/wiki/Wiki>

This wiki is implemented with [DokuWiki](#). Fundamental concepts for [DokuWiki](#) include: [page](#) and [Namespace](#). Please note the icon and color of "DokuWiki, page and Namespace" in the previous sentence. The icon indicates a link/reference to content that is not part of this wiki. If you find a broken link, please leave a comment in the Discussion section of this page.

Features of this page

If you are looking at this page on a computer with a mouse, focus the mouse pointer on words that have a blue or green color. Words in blue, are links to external references and words in green, are references to documents that exist in this wiki. I should probably state that this document was created with black text on a white background. If you are not viewing this page as black text on a white background, my comments about the color of links may be wrong.

Please note the "[Sitemap](#)" feature/link in the upper right portion of this page. Sitemap appears just below the Search box. Sitemap produces an outline of the namespaces and page names in this wiki. Viewing the Sitemap on dokuwiki.org or using the Search window, can be helpful if you are "learning to use DokuWiki or this wiki". There is a "Discussion" section on most pages, but not this page. The purpose of the Discussion section is to allow comments and suggestions about the content of a page. [Discussion](#) is implemented with a dokuwiki plugin. The Discussion feature has been enabled for all pages of this wiki, but not this page. Why? In the early days of this wiki, [BOTS](#) discovered the "open" Discussion section and deposited content that was not on subject. Follow this link, for [general discussion](#) about this wiki. Discussion is moderated. This means that comments will not appear to other readers of this wiki until an administrator has approved the comment. Why? Because the internet is rich with contributors that choose to make comments that are not about the goals of this wiki. How do I know? Without moderation, comments were added that were not on subject. It appeared the off subject comments were being injected by [BOTS](#). Disabling Discussion for a page requires administrative credentials.

This wiki is **a work in progress**. It is intended to encourage community readers and contributors. The details of managing content are also a work in progress. The hope is: Dokuwiki has the features that allow residents to contribute and benefit from the content.

Why have this wiki?

Power Options

Control Panel > Hardware and Sound > Power Options

Control Panel Home

Choose what the power buttons do

Create a power plan

Choose when to turn off the display

Change when the computer sleeps

www.energystar.gov

Choose or customize a power plan

A power plan is a collection of hardware and system settings (like display brightness, sleep, etc.) that manages how your computer uses power. [Tell me more about power plans](#)

Preferred plans

☐ **HP Recommended (recommended)**

Automatically balances performance with energy consumption on capable hardware.

[Change plan settings](#)

☐ Power saver

Saves energy by reducing your computer's performance where possible.

[Change plan settings](#)

Hide additional plans

☒ **High performance**

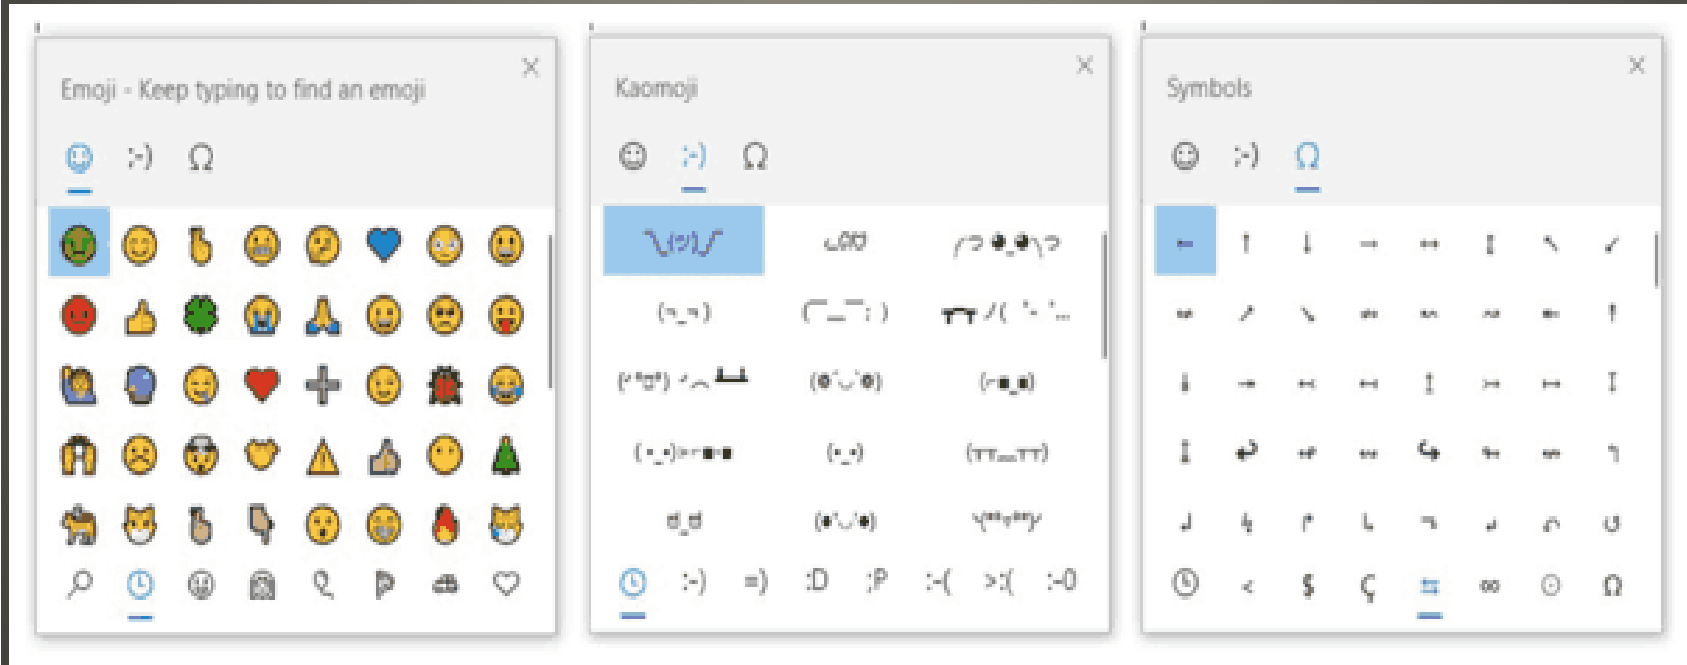

Favors performance, but may use more energy.
