June 18, 2020—KB4567523 (OS Build 19041.331)

Applies to: Windows 10, version 20H2, all editions; Windows Server, version 20H2

Release Date:	June 18, 2020
Version:	OS Build 19041.331

IMPORTANT: We have been evaluating the public health situation, and we understand this is impacting our customers. In response to these challenges, we are prioritizing our focus on security updates. Starting in May 2020, we are pausing all optional non-security releases (C and D updates) for all the supported versions of Windows client and server products (Windows 10, version 20H2 down to Windows Server 2016 SP2).

There is no change to the monthly security updates (B releases – Update Tuesday); these will continue as planned to ensure business continuity and to keep our customers protected and productive.
