Windows 11 Patch Tuesday

- The December 2024 Patch Tuesday update for Windows includes several important updates and security fixes. Here are the key details:
- Windows 11 Update (KB5048667): This update advances Windows 11 24H2 to Build 26100.2605. It includes new features such as a simplified system tray with a more compact layout, personalized offers based on user preferences, and cosmetic changes to the taskbar.
- Windows 10 Updates: Multiple updates were released for different versions of Windows 10. These updates address security issues and bring the builds up to 19044.5247 and 19045.5247.
- Security Patches: The updates include security patches for both Windows 11 and Windows 10, addressing vulnerabilities and improving system stability.
- .NET Framework Updates: Updates for the .NET Framework 3.5 and 4.8.1 were also released as part of this Patch Tuesday.

 - Hyper-V

Windows Recall

Windows Recall Search settings

- Microsoft Windows 11

TPM 2.0 plays a crucial role in enhancing identity and data protection on Windows devices, as well as maintaining the integrity of your system. TPM 2.0 also helps future-proof Windows 11. One way it does so is by helping to protect sensitive information as more AI capabilities come to physical, cloud, and server architecture.

Steven Hosking, Senior Product Manager at Microsoft

Microsoft Connected Experience

Experiences that download online content

Office can provide you with searchable, downloadable online content like templates, images, and videos. For example, experiences that help you search for online pictures to add to your slides.

☐ Turn on experiences that download online content

 If you turn this off, some experiences won't be available to you.

All connected experiences

Connected experiences include things like analyzing content, downloading online content, and online file storage. Outlook email services and essential services, such as downloading updates, will still work even when this setting is not turned on. This setting also allows you to apply your account privacy settings across devices.

Microsoft Account

- AI any/everywhere

The Connected Experiences setting enables cloud-backed features designed to increase your productivity in the Microsoft 365 apps like suggesting relevant information and images from the web, real-time co-authoring and cloud storage, and tools like Editor in Word that provide spelling and grammar suggestions.

Microsoft has been using AI in Microsoft 365 for years to enhance productivity and creativity through features like Designer in PowerPoint, which helps create visually compelling slides, and Editor in Word, which provides grammar and writing suggestions. These features do not rely on generative AI or Large Language Models but rather use simpler machine learning algorithms."
