

IPHONE CAMERA VIDEO TUTORIALS: (1/10/24))

Below are eleven videos that cover the main points on **how to use your iPhone camera**:

Videos A and B are comprehensive reviews of all iPhone camera functions. Video A is 76 minutes long while Video B is 18 minutes long. If you have time watch A, but B will give you the basics. I have provided a breakdown of topics within the videos to expedite your review of particular subjects.

Video C specifically covers the **iPhone 14 Pro and 14 Pro Max Cameras**.

Videos D-F cover the **CAMERA APP** specific to the **Pro and ProMax models of the iPhone13 and 12**.

Videos G thru K cover **Settings, Lens Selection, and Portrait, Night, and Pano Modes**.

A. iPhone Camera App A complete overview of iPhone Camera operation. Provided courtesy of **Phillip Pensabene and the iDevices SIG of the Computer Club**. **Click link below** to view the January 2021 iDevices SIG VIDEO: (Camera App tutorial starts at 4 minutes and 08 seconds into video)

F. How To Master the **Camera App on iPhone 12 & iPhone 12 Pro!**

<https://youtu.be/QU6IFkTZhYk>

8:31

- Volume button as shutter release
- Volume UP button as Burst mode
- Hold down Volume button for video start
- Tap and hold regular shutter button for video
- Press and swipe shutter button to right for video
- Tap and drag shutter button to left for burst mode
- View outside the frame presented but not usable for edit
- Aspect Ratios: (tap icon on top) 4:3, 1:1, 16:9
- All 4:3 data available to adjust cropping
- 12 has 2 cameras (wide, Ultra-wide), Pros have 3 cameras (Wide, Ultra-wide and Telephoto, 2X and 2.5x)
- Zoom dial, 12 - 5X, 12 Pro 10X
- Swipe down to remove Zoom dial
- Portrait mode, 6 lighting effects, and change aperture
- Pro and Pro Max 1X 2X zoom for new Night Mode Portrait shots
- Night Mode works on all 4 cameras
- Dolby Vision HDR available in video 4k30 vs 30 & 60 Pro

G. How to pick the Correct iPhone Camera Settings

https://youtu.be/rJ3Ly59_Ppw

13:26

- Formats: HEIF or JPEG/Most Compatible
- HDR: AUTO or OFF and keep Normal photo or not
- Filters
- Self Timer: 3 or 10 Seconds
- Live Photos
- HDR Auto
- Flash: Off
- Selfie: Front facing - poorer quality
- Telephoto: 1X or 2X if 2 lenses
- 7 Photo Modes: Time-Lapse? SloMo/Video/Photo/Portrait/Square/Pano

H. How To Choose The Correct iPhone Camera Lens

<https://youtu.be/pwqQrzWwJFg>

13:12

- Up to 3 lenses (.5, 1X and 2X or 2.5X)

- Lens choice is a creative decision
- 1X View is the Wide Angle Lens
- 2X View is the Telephoto lens
- .5X View is the Ultra Wide lens
- Digital Zone - Tap and hold lens button and turn
- Lens choice changes relationship between near and far objects
- Compression occurs when Telephoto lens is used
- Background appears larger than when viewed with 2X lens
- Background appears smaller when viewed with .5X lens
- 1X Wide Angle best for Landscapes and Night photos
- 2X Telephoto Lens is best for portraits and landscapes
- .5X Ultrawide Lens best for indoor photos and landscapes
- 2X is very important and used more than .5X
