

November 2010

This SIG provides more opportunity for sharing of experiences than the more typically structured classroom, lecture or formal setting.

Welcome to the eleventh **iDevices** (iPhone, iPod & iPad) SIG Meeting

To go to the iPhone, iPod & iPad **FORUM**, [click HERE](#)

To find Apps that cost money but are **FREE** today, [click HERE](#)

In order to make this a successful presentation, I am asking that you do not use your iPhone, iPod or iPad to access the web during the meeting.

iPhone Hamburger

Chill out with the iPhone-powered massage chair

by [Mike Schramm \(RSS feed\)](#) on Oct 20th, 2010

We've seen an iPhone-controlled [R2-D2](#), a [quadricopter](#), a dog treat [dispenser](#), a [tank](#), and even an iPhone-controlled [soda machine](#). But c'mon people, let's get a little more practical here -- let's hook it up to a [massage chair](#). That's exactly what Human Touch did with the [HT-9500](#). For just US\$4,999, you can sit back, relax, and let your iPhone do the massaging. The free [HT-Connect app](#) designed to work with the chair allows you to control posture and massage frequency, and you can even set schedules and create programs designed to work your back in just the right way.

Sure, sure, playing Angry Birds or texting friends on your iPhone might be cheaper, but this chair lets you -- oh wait. Yeah, that's the... oh yeah, right there. Oooohhhh yyeeahhhhh.

As for iPad-owning tourists planning to visit China through Hong Kong, South China Morning Post warns the fee for failing to leave your gadget at home could be \$120.

AT&T activates record-setting 5.2 million iPhones this summer

by [Dave Caolo](#) ([RSS feed](#)) on Oct 21st, 2010

AT&T set a new record by [activating 5.2 million iPhones in the US over summer of 2010](#). That's a huge number, especially considering that it activated 3.2 million iPhones in the spring. That's a soaring leap of 62.5 percent.

In total, AT&T switched on more than 8 million "integrated devices" during that quarter, the majority of which were iPhones. The company also grew its customer base by 2.6 million, bringing the grand total of those of us enjoying its services to 92.8 million. Finally, the iPhone is being recognized for producing AT&T's best ever customer turnover rate of 1.32 percent.

Remember that "antenna issue" that was supposed to kill the iPhone 4? Yeah.

it will be interesting to see what happens to AT&T's numbers should the [rumors of a Verizon phone](#) come to fruition. Would there be a mass exodus? We can only assume that AT&T hopes the answer is no

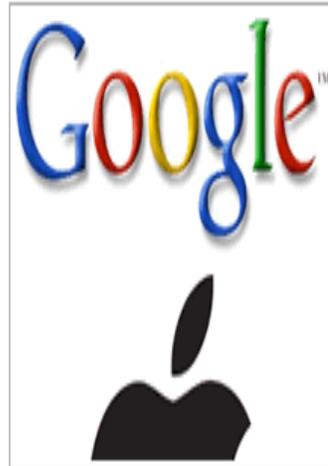

at&t

“By the end of 2010, we expect the average U.S. consumption to be approximately 325 MB/mo, up 112% from 2009,” Sharma predicts. According to his estimates, “the total US mobile data traffic will exceed 1 Exabyte for the first time by the end of 2010.” Exabyte, is a unit of information equal to 1000 petabytes or a billion gigabytes. In comparison, global Internet traffic was estimated to be over 21 exabytes in March 2010.

Google Instant Arrives on iPhone.

By Darrell Etherington | Nov. 4, 2010, 1:26pm PDT |

Originally announced back in September, Google Instant for mobile went live today, bringing the auto-populating search results to iPhone and Android devices. Like on the desktop, Instant displays search results as you type into the Google.com search field.
