# iPad & iOS 11
The Amazing New Dock

Phillip Pensabene
November 2, 2017

The New iPad Dock

- **Many similarities to the Mac dock**

- **It is an app launcher with some superpowers**

- **Stays put when swiping between home screens**

- **Can be summoned from within an app**

  - **Swipe up from bezel at the bottom of screen -or-**

 - **⌘⌥D (command, option, D) from connected keyboard**

Who Swiped The Dock?

- **'Swipe up' previously activated the Control Center**

- **Now, a short 'swipe up' opens the Dock**

- **A longer 'swipe up' opens three things a once:**

  - **Dock**

  - **Control Center**

  - **App Switcher**
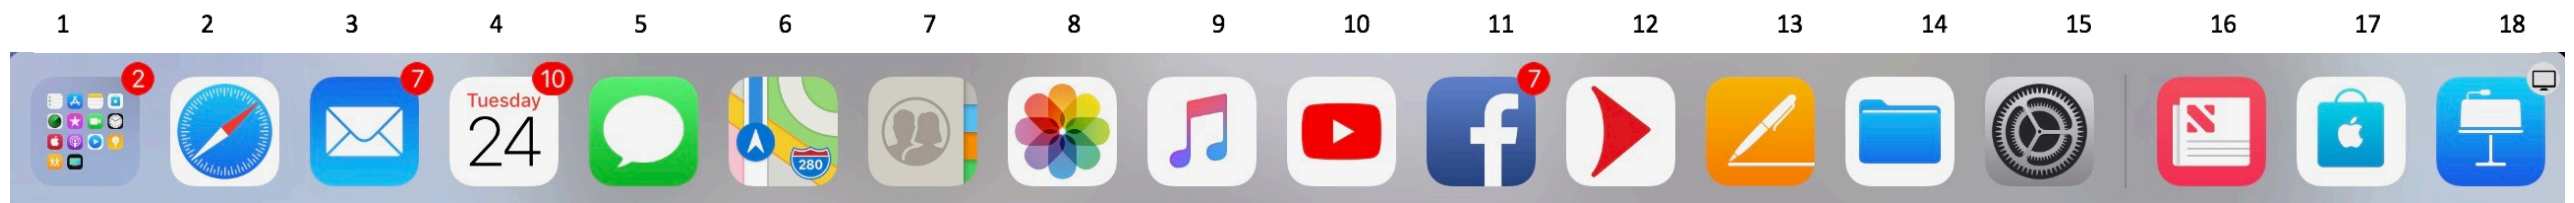

Arranging The Dock

- **Works somewhat like previous iOS releases**

- **Light press on app makes them 'float' -or-**

- **Make apps 'jiggle' then drag in and out of dock**

- **Folders can be added to the dock**

Arranging The Dock

- **iPad in iOS 10 had limit of 6 apps in dock**

- **You can add up to fifteen apps/folders to the dock**

- **Plus 3 spots for recently used apps**

  - **If app is in the dock, it doesn't move to 'recents'**

  - **Handoff from iPhone or Mac**

 - **Turn off 'recents' in settings if desired**

Mac Style Dock Actions

- **Long press on an app opens recently accessed files**

- **Tap 'Show More' to display more**

Mac Style Dock Actions

- **Drag and Drop to Apps on the dock**

    - **Safari Links, Files, Photos**

    - **Select multiple items to drag and drop**

- **Drag & Drop to folder - drills down to enclosed apps**

'Slide Over' Multitasking

- **Put a 'live' floating app window over an open app**

- **Swipe up the dock to select 'slide over' app**

- **Drag app up off the dock to the middle of screen**

- **Both apps are live and can be used**

'Slide Over' Multitasking

- **Defaults to right side of screen**

  - **Use handle to 'slide' left or right**

- **Slide off right side of screen using handle to dismiss**

- **Slide back onto screen from right bezel**

- **Drag and drop to and from either window**

- **'Slide over' is persistent even when main app closed**

'Split Screen' Multitasking

- **You can have two active apps side by side**

- **Swipe up the dock**

- **Drag 2nd app up and to right (or left)**

- **2nd app fits in right (or left) 2/3 of the screen**

- **Use handle to adjust windows to 1/3, 1/2 or 2/3**

'Split Screen' Multitasking

- **You can drag and drop between apps**

- **Dragging a new app into either pane replaces the old app**

- **Slide handle all the way right or left to remove 2nd app**

- **Persistent pairing - apps remain paired**

Slide Over to Split Screen (and back)

- **Swipe up the dock and drag up a 'slide over' app**

- **Drag the handle down to convert to split screen mode**

- **Drag the handle down again to convert to slide over mode**

Slide Over & Split Screen

- **Slide Over mode supported on:**

  - **iPad mini 2, and iPad Air, 5th gen iPad and newer**

- **Split Screen mode supported on:**

  - **iPad mini 4, iPad Air 2, 5th gen iPad and newer**

- **Most but not all apps support Split Screen**

  - **e.g. Zillow**

Bonus Tip - Just Flick It

- **No need to shift for symbols**

- **Drag down or flick the key**

- **Slightly different keyboards depending on the app**

- **Apple apps**

- **3rd party apps (e.g. Facebook,**

Just Flick It - Example 1

Just Flick It - Example 2
