- » [Online Registration Information](#)

*[Click here to take a virtual tour of our facilities.](#)*

Welcome to the  
website of the  
Sun City Texas  
Computer Club.

### *Computer Club / Photography Club Cooperation*

Sun City meeting space availability diminishes every year. In the spirit of neighborly cooperation, and to maximize the use of the facilities allocated to the Computer Club, the Board has welcomed the Photography Club for periodic classes and meetings in our facilities.

## A Wiki for the Sun City Texas Computer Club

What is a **Wiki** ? A Google search for "What is a Wiki" is likely to produce this result: <https://en.wikipedia.org/wiki/Wiki>

This wiki is implemented with [DokuWiki](#). Fundamental concepts for [DokuWiki](#) include: [page](#) and [Namespace](#). Please note the icon and color of "DokuWiki, page and Namespace" in the previous sentence. The icon indicates a link/reference to content that is not part of this wiki. If you find a broken link, please leave a comment in the Discussion section of this page.

### Features of this page

If you are looking at this page on a computer with a mouse, focus the mouse pointer on words that have a blue or green color. Words in blue, are links to external references and words in green, are references to documents that exist in this wiki. I should probably state that this document was created with black text on a white background. If you are not viewing this page as black text on a white background, my comments about the color of links may be wrong.

Please note the "[Sitemap](#)" feature/link in the upper right portion of this page. Sitemap appears just below the Search box. Sitemap produces an outline of the namespaces and page names in this wiki. Viewing the Sitemap on [dokuwiki.org](https://dokuwiki.org) or using the Search window, can be helpful if you are "learning to use DokuWiki or this wiki". There is a "Discussion" section on most pages, but not this page. The purpose of the Discussion section is to allow comments and suggestions about the content of a page. [Discussion](#) is implemented with a dokuwiki plugin. The Discussion feature has been enabled for all pages of this wiki, but not this page. Why? In the early days of this wiki, [BOTS](#) discovered the "open" Discussion section and deposited content that was not on subject. Follow this link, for [general discussion](#) about this wiki. Discussion is moderated. This means that comments will not appear to other readers of this wiki until an administrator has approved the comment. Why? Because the internet is rich with contributors that choose to make comments that are not about the goals of this wiki. How do I know? Without moderation, comments were added that were not on subject. It appeared the off subject comments were being injected by [BOTS](#). Disabling Discussion for a page requires administrative credentials.

This wiki is **a work in progress**. It is intended to encourage community readers and contributors. The details of managing content are also a work in progress. The hope is: Dokuwiki has the features that allow residents to contribute and benefit from the content.

## yet another Microsoft 10 Build 1903 Out-of-Band emergency update

A rare out-of-band emergency update for Microsoft Windows 10 build 1903 was released September 23. "Seekers", those who check Windows Update often had the ability to obtain and apply the update.

After the cyber security SIG meeting today, our return home saw yet another out-of-band emergency update.

The update is for Internet Explorer. Though you may not use Internet Explorer in favour of other browsers, other apps and malware designed to take advantage of this flaw can and will use Internet Explorer.

It is important to reboot/restart systems after these two emergency updates even though the update process does not by default.

## Apple Reminders

With iOS 13 upgrades and iPadOS a big problem. The Reminders app may and probably will lose older reminders. Older reminders not in the traditional sense. Older reminders created or edited with previous versions of Apple Reminders app!

## Patching patching patching

Microsoft released an emergency patch yesterday. Rare for Microsoft to do an out-of-band patch. Department of Homeland Security issued a bulletin about this patch. Most of the reports are concerning exploits in Internet Explorer. You may think you don't use Internet Explorer, having moved on to Edge, Chrome, Firefox, Opera, Brave, Tor, or others.

**BUT malware can invoke Internet Explorer on your system to visit malware sites.**

\*\*\* This is an automatic generated email, do not respond. \*\*\*

Hi,

This email has been sent to you, because your windows computer has contracted a trojan horse virus. The trojan horse virus has been known for collecting information about you(This includes credit card numbers and bank account logins).

So we strongly advise you to block your credit cards and your bank account logins, that you have used on your computer.

Microsoft has developed a scanner that can help you terminate the trojan horse virus.

The scanner has been developed under safeplaces L.L.C. which is a Microsoft subsidiary.

It's important that you download and install it quickly, because the trojan horse virus will ruin your computer.

Here you can download the security scanner:

Download
