What to Do After Receiving a Data Leak Notice on iPhone

Once the data leak notice pops up, you'll want to take immediate action to secure your account. Delaying means that your compromised password is accessible to others, increasing the odds that someone else may log into your account. By taking the right steps quickly, a data breach involving your accounts is less likely. Here's what you need to do.

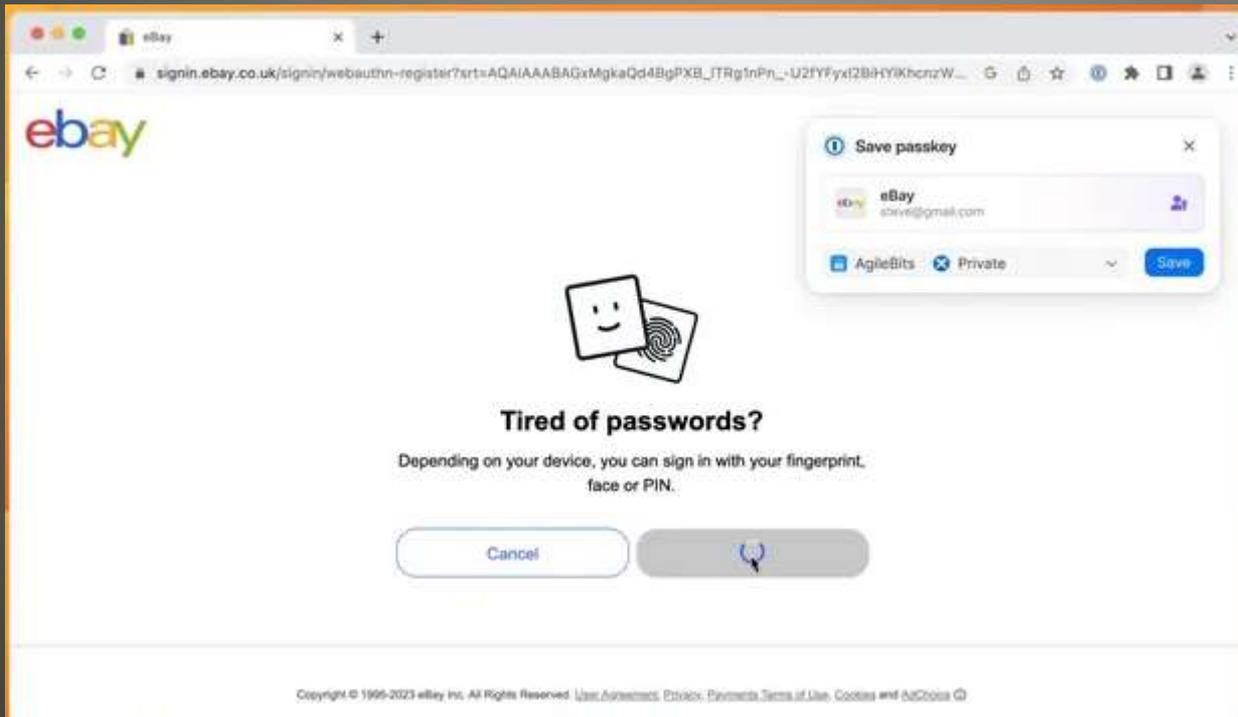

Use the "Change Password on Website Option"

When the data leak notice appears on your iPhone, it contains two choices: "Change password on website" and "Not now." Tap the "Change password on website" option. By doing so, you're routed to the appropriate site and can immediately change your password.

Western Digital

Dear Customer,

May 5, 2023

We are writing to notify you about a network security incident involving your Western Digital online store account. After learning of the incident, we quickly launched an investigation to understand its nature and scope. We are working with leading outside forensic and security experts to assist with our investigation and are coordinating with law enforcement.

Based on the investigation, we recently learned that, on or around March 26, 2023, an unauthorized party obtained a copy of a Western Digital database that contained limited personal information of our online store customers. The information included customer names, billing and shipping addresses, email addresses, and telephone numbers. As a security measure, the relevant database stored, in encrypted format, hashed passwords (which were salted) and partial credit card numbers.

We have temporarily suspended online store account access and the ability to make online purchases. We expect to restore access the week of May 15, 2023.

As a precautionary measure, you can take the following steps to help protect your personal information from potential misuse:

- Be cautious of any unsolicited communications that ask for your personal information or refer you to a web page asking for personal information.
- Avoid clicking on links or downloading attachments from suspicious emails.
- Check whether your email account has spam settings to help you detect or block suspicious emails.

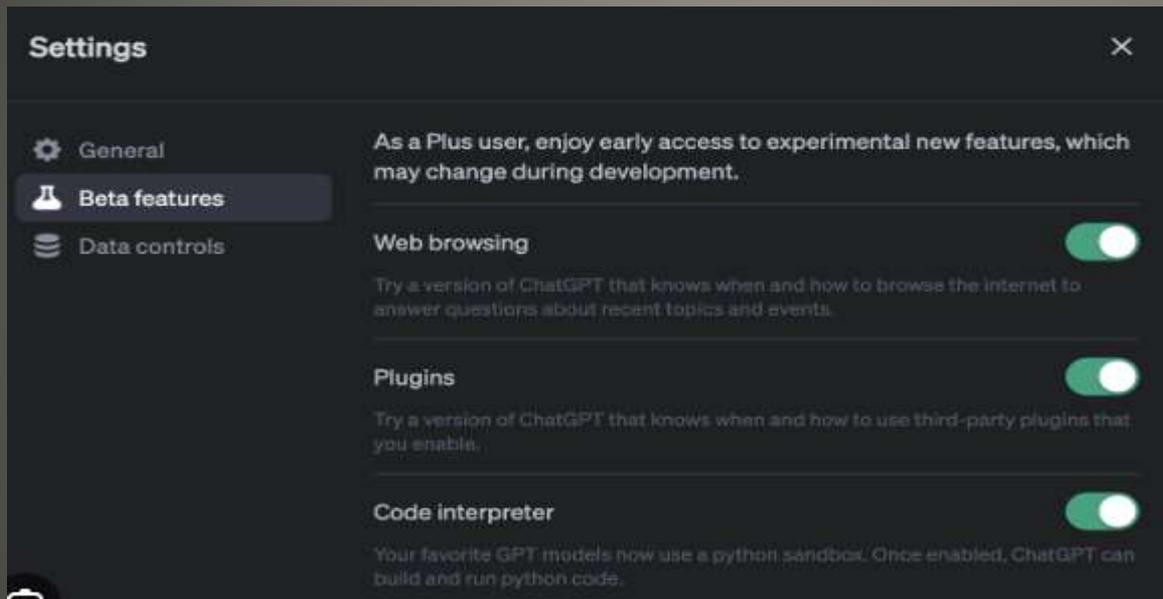

We hope this information is useful to you. If you have any questions regarding this incident, please call 855-493-7867, Monday – Friday, 8am – 5pm PST.

We take the protection of your personal information very seriously and regret any inconvenience this may cause you.

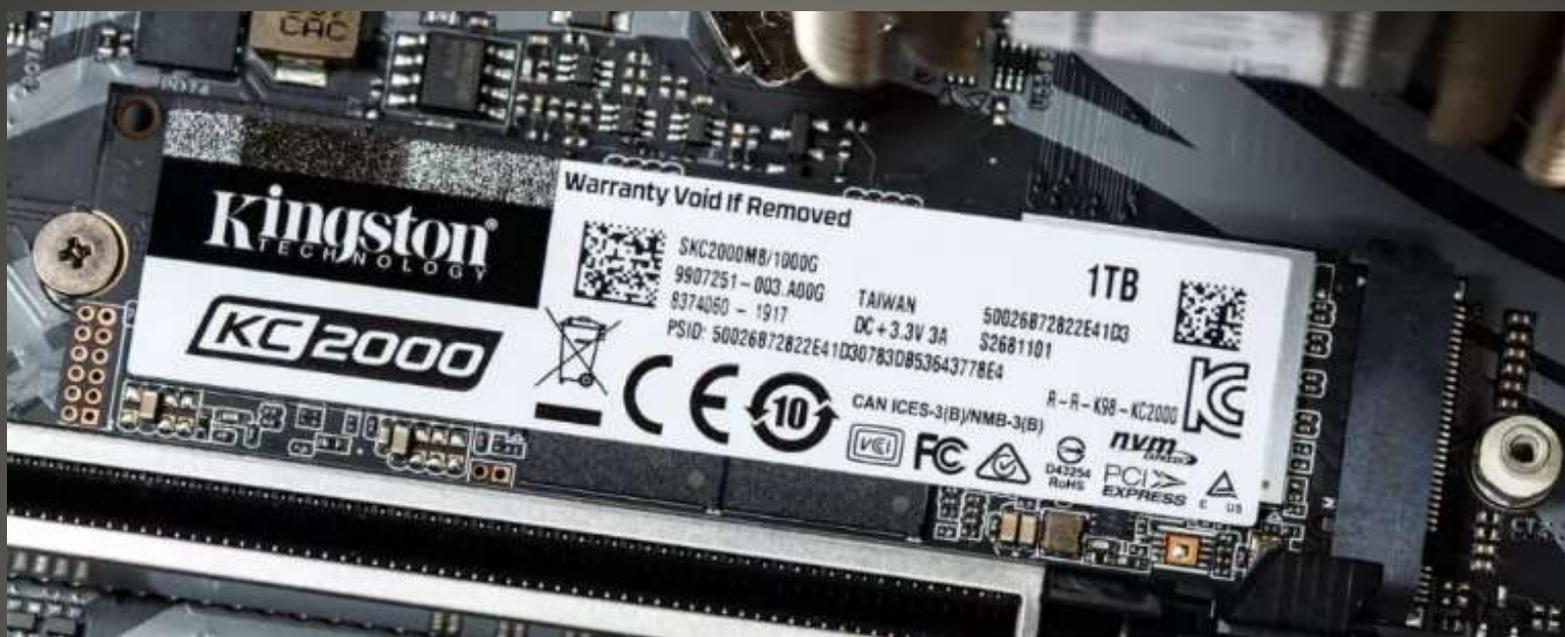

Sincerely,

Eyal Bek

↳ DF Airways

Dear Customer Service,

I am writing to request a full refund for my canceled flight, DF 4542, on February 4, 2023. I understand that you are offering a voucher as a gesture of goodwill, but I would prefer to be reimbursed for the cost of my ticket.

I have been a loyal customer of your airline for many years and have always been satisfied with your service. However, I am very disappointed with the way my recent flight was handled. I was not given any advance notice of the cancellation, and I was forced to make alternative arrangements at the last minute. This caused me a great deal of inconvenience and expense.

I believe that a full refund is the only fair way to compensate me for the problems I experienced. I have enclosed a copy of my original ticket for your reference.

Thank you for your time and consideration.

Sincerely,
Rowan

Wear OS 4 is coming to help you track your golf game

We last talked about the enhanced split-screen features they are finally beginning to arrive in the Beta Channel of for any setup, flags, tweaks, or changes to start taking added addition if you ask me, and one that I think will make a you see how it works on touch-enabled devices when in

setup is pretty sweet for desktop mode, too. To see all hover the window expand button between the minimize of any window. Once you do, a small window will appear that for your current window.
